Dialog Graph

JustyGames 2026

1. Right-Click in Project Window and Create a Dialogue Container.
    a. **Create > Dialogue > Container**
2. Open Dialogue Graph.
    a. **Window > Dialogue Graph**
3. Place the newly created Dialogue Container in Dialogue Asset slot.
4. Create a Dialogue Tree.
    a. **Dialogue Node:**
        i. Add Choice Button - Add more choice options
        ii. Speaker - Name of current character speaking
        iii. Speaker Icon - Portrait Image of current speaker
        iv. Dialogue - Text that will be displayed
    b. **Event Node:**
        i. Event ID - Unique string (Same as string in HandleDialogueEvent)
        ii. Parameter - only use if Event has a string parameter
    c. **Condition Node:**
        i. True - if Condition Key is True
        ii. False - if Condition Key is false
        iii. Condition Key - Name of your Condition (string)
5. Once the Dialogue Tree is Completed and Saved. Create an empty GameObject and add **DialogueManager** and **DialogueConditionProvider** each as a component.
6. In the **DialogueConditionProvider** create your Condition Keys and set the values.
7. Create a Canvas and add:
    a. DialoguePanel (empty/Image)
        i. SpeakerName (TextMeshProUGUI)
        ii. DialogueText (TextMeshProUGUI)
        iii. SpeakerIcon (Image)
    b. ChoicesContainer (empty/Image)
8. Create an UI Button and save it to your Prefabs folder.
9. Place corresponding GameObjects/Components in each slot on **DialogueManager**.

10. To run the Dialogue, subscribe to **OnDialogueEvent** from any script.

11. Call **StartDialogue(DialogueContainer dialogue)** from any script, be sure to have that script reference the active/current **DialogueContainer**.
